

# SURVEY OF EUROPEAN VENTURE CAPITALISTS

The venture capital (VC) landscape in Europe is quickly growing. New trends (impact investing, deep technologies investment, Covid-19 crisis, blockchain, Brexit, digitalization of finance, ESG factors, etc.) and incomers (crowdfunding platforms, foreign VCs, new forms of corporate VC, etc.) also create new needs of understanding this changing ecosystem.

To better understand the European VC landscape, leading European business schools and universities have joined their efforts in the shape of a consortium. Institutions from France, the UK, Germany, Belgium, Spain, Italy and Sweden work together in this way.

Our questionnaire is focused on concrete practices in venture capital. Your response will help us to understand the European VC landscape so building relevant recommendations for policy makers, equity investors, entrepreneurs and the public, and guiding academic research.

This survey is designed to take about 20 minutes. Your responses are strictly confidential and will be used only for noncommercial research purposes. Only aggregated results will be published.

[Click here for more details \(GDPR statement\).](#)

**Are you an equity investor investing in innovative European start-ups?**

**Please answer our survey [HERE](#)**

As an incentive for your participation, we will give you an early look at the survey results that will allow you to compare your responses to those of your peers ( Please provide your email address for this purpose).

You will also be invited to private VIP special presentations of early results, held by our institutions.

Many thanks for your cooperation.
